Sculptural Lights

W H I T E D I R T

ORA is our first foray into lighting. Each hand-carved light in this collection is a nod to cultivating quiet moments of reflection.

Natural elements are melded together to create a sculptural piece that is both an artifact and an everyday fixture.

"Ortolan. It is a deep fried
songbird. You eat it whole.
This is like a rare privilege.
And it's also kind of illegal.
[The napkin] is for the head.
The exact purpose is debated.
Some say it is to mask the
shame. Others to heighten the
pleasure."
